EXPERIENCE

Associate Engineer – R&D | AceSoft Labs Sept 2025 – Present

- Built a cross-platform event management app using React Native, React, and Supabase with secure authentication and real-time data synchronization.
- Integrated AI-based face recognition using Python for automated attendee verification, improving check-in efficiency and event security.
- Developed scalable backend services with Python and Supabase, implementing REST APIs and real-time database operations.
- Designed responsive, reusable UI components using React Native and React, ensuring cross-device compatibility.
- Built a high-performance mobile app using Flutter and Dart with real-time data integration and optimized state management.
- Integrated Supabase backend for database, authentication, and real-time updates with scalable architecture.

Software Development Engineer 1 (SD1) | Quanta July 2024 – Present

- Designed and maintained MySQL schemas optimized for scalability and data integrity.
- Integrated third-party APIs for real-time synchronization and collaboration features.
- Developed scalable backend APIs using FastAPI and Flask for high performance and reliability.

Python Development – Intern | Besant Technologies July 2024 – Present

- Developed responsive front-end and backend interfaces using HTML, CSS, JavaScript, SQL and React, ensuring cross-device compatibility.

PROJECTS

• Responsive Doctor App | HTML, CSS, JavaScript, Firebase Sept 2023 – Jan 2024

Created a responsive mobile application that connects doctors and patients, facilitating appointment scheduling and enhancing healthcare coordination. Designed an intuitive UI and implemented Firebase for real-time data synchronization.

• Quiz System | JavaScript, HTML, CSS, AJAX May 2023 – June 2023

Engineered a lightweight, efficient quiz management system that requires minimal manual input. Leveraged asynchronous JavaScript (AJAX) for dynamic content updates and a seamless user experience.

• Microsoft (AI & ML) Project | Python Mar 2021 – July 2021

Built a computer vision system to recognize clothing brands and identify similar garments. Utilized image processing and AI to streamline clothing detection and comparison for retail automation.

TECHNICAL SKILLS

Programming Languages: Python, R, Java, JavaScript, SQL, Fullstack SAAS

Databases: PostgreSQL, MongoDB, Supabase, Firebase

Frameworks: FastAPI, ReactJS, Flutter, React Native

Frontend Development: React, Redux, Tailwind CSS, TypeScript, JavaScript

Backend Development: Python, FastAPI, Node.js, Express.js

AI & ML: LLMs, NLP, Prompt Engineering, Fine-tuning

Tools: GitLabs, VS Code, Firebase

EDUCATION

B.Tech in Computer Science (AI & ML) 2024
Presidency University, Bengaluru Aug 2020 – Jun 2024

12th 2020
Sri Chaitanya Jr. College Jun 2019 – Mar 2020

10th 2018
Amalodbhavi St. Mary's High School Jun 2017 – Mar 2018
